

Logistics and International Forwarding

BACHELOR'S DEGREE - SPECIALITY

Form: Full-time

Study form: Hybrid

Features: Engineer's degree • From October • English • 7 semesters

City: Chorzów/Katowice

What will you learn?

- You will learn to design **logistics services**, enabling you to tailor processes to client needs.
- You will acquire the ability to use **IT technologies in logistics processes**, helping you work more efficiently and effectively.
- You will learn the principles of **organising an international supply base**, preparing you to manage global deliveries.
- You will master the organisation of **distribution structures**, enhancing your competences in supply chain management.
- You will learn to manage **intermodal transport and fleet operations**, opening up opportunities in the transport sector.

Work opportunities

- As an **international freight forwarder**, you will manage transport processes on a global scale.
- Working as a **logistics project coordinator**, you will be responsible for carrying out complex logistics operations.
- As a **supply chain specialist**, you will ensure that transport activities comply with legal regulations.
- You may develop your career as a **logistics department manager**, leading teams and optimising processes within a company.
- Working in the **export planning area** will enable you to build your career in internationally operating companies.

- A special case study, part II

Foreign language study

As part of their studies, our students participate in **Polish language classes**. These courses are designed to support everyday communication, facilitate integration into the local environment, and enhance their overall study experience in Poland.

Internships and practical training

Student internships are an important part of the course. Students of undergraduate and long-cycle master's programmes complete **960 hours of internships** (24 weeks), gaining professional experience. If you already work in a profession related to your field of study, you may have your internship credited based on your employment. During your studies, you also have the opportunity to take part in a paid placement. Internship programmes are prepared by our partner employers, who tailor their requirements to specific positions, making it easier to take your first professional steps.

Study completion requirements

You work in a team on a diploma project that addresses a practical or theoretical problem related to your field of study. By researching the literature and conducting your own analyses, you develop an original proposal for solving the problem. Everything you learn during your studies enables you to create a professional project based on real data and actions. To obtain your bachelor's degree, you must defend this project before a committee. You are the one who defines the direction of your project!

How to become a WSB Merito University student

You can enroll in a **first degree (e.g. Bachelor's or Engineer's) program** if you have successfully completed your secondary education and have a secondary school-leaving certificate.
