

IT Project Management

MASTER'S DEGREE - SPECIALITY

Form: Full-time • Part-time

Study form: Traditional (on-site)

Features: Master's degree • From October • English • 4 semesters

City: Gdańsk

What will you learn?

- **You will learn IT project management**, from defining scope and creating schedules to controlling budgets, quality, and risk in a dynamic environment.
- **You will learn about IT tools supporting projects**, enabling you to effectively plan, monitor, and implement modern solutions in complex systems.
- **You will master designing information systems**, which support management of production and logistics in the global business environment.
- **You will develop soft skills like negotiation and team management**, helping you to lead project teams effectively and build professional relationships.
- **You will gain knowledge of IT project management methodologies**, such as Agile, enabling you to adapt flexibly to changing client and organizational needs.
- **Thanks to international IACBE accreditation, your skills will be recognized globally**, increasing your job prospects in the IT sector.

Work opportunities

- **Become an IT project manager.** Plan and manage technology projects in manufacturing, R&D, or logistics, adapting activities to business needs.
- **Work as an IT team manager.** Coordinate programmers, analysts, and IT architects, ensuring project quality and effective team collaboration.
- **Get hired as an innovation implementation specialist.** Support companies in adopting modern solutions.
- **Be an IT project analyst.** Prepare analyses, feasibility assessments, and recommendations for technology projects, supporting strategic decisions in companies.
- **Work as an IT solutions architect.** Design information and technology systems that meet organizational needs and support management and production processes.
- **Become an IT project risk management specialist.** Monitor and minimize project risk, ensuring smooth task execution in an international environment.
