

Information Technology - Advanced Database System

- Program - studia II stopnia

full-time IN OCTOBER Master's English

What will you learn if you choose Information Technology

Become a Data Expert: Unlock the Power of Advanced Database Systems

Are you ready to dive deep into the world of Big Data and become a sought-after data specialist? Merito University in Poznań's "Advanced Database Systems" program equips you with the skills to manage distributed data resources, extract valuable insights from global information troves, and analyze complex data structures. You'll learn how to store and process data in the cloud, share resources for scalability, and master Big Data system architectures like Lambda and Hadoop with MapReduce. Although a full English-taught IT program is in development, this specialization provides you with globally relevant expertise.

Launch Your Career in High-Demand Digital Roles

This program prepares you for a variety of exciting roles, including positions in marketing, advertising, and PR agencies; tech companies and startups; digital and marketing automation departments in large corporations; non-profit organizations and government agencies; AI research institutions; and consulting firms specializing in AI. You'll also be equipped to launch your own business, offering creative and marketing services powered by AI. With specialized courses in Personal Branding (English), Digital Innovations, Digital Marketing Design, Legal Aspects of Digital Transformation, Artificial Intelligence for Business (English), and more, you'll be ready to lead the digital marketing revolution.
