

# IT in Business

BACHELOR'S DEGREE - PROGRAM

**Form:** Full-time

**Study form:** Traditional (on-site)

**Features:** Bachelor's degree • From October • English

**City:** Toruń

## What will you learn?

- You will learn the principles of designing and implementing IT systems that support business management in a dynamic environment.
- You will master the use of modern IT tools such as databases, ERP systems, and virtual reality technologies.
- You will develop skills in data analysis and algorithm design, preparing you to work with large sets of information.
- You will learn IT project management methodologies, including Agile and Scrum, enabling you to effectively lead technology teams.
- You will gain knowledge about cybersecurity, allowing you to prevent threats and protect data within IT systems.
- You will learn to create mobile applications and web solutions, opening career opportunities as a front-end developer.

## Work opportunities

- You will find employment as a mobile application developer, creating solutions tailored to clients' needs.
- Work as a data analyst, processing and visualizing information for business purposes.
- Pursue a career in the IT department as a systems administrator, ensuring their security and performance.
- Develop your career as an IT consultant, helping companies integrate modern technologies with business processes.
- Become an IT systems designer, implementing innovative solutions that support business management.
- Work in the e-commerce sector as an internet technology expert, developing online sales platforms.

## Study program

### Practical studies

We teach in a way that best prepares you for the real challenges you will face in your professional career.

- Group projects – real business problems.
- Simulations – decision-making in market conditions.

- Internships and placements – experience in companies.
- Lectures with practitioners – experts from the industry.
- Modern tools – up-to-date technologies.
- Case studies – analysis of real-life examples.

- Introduction to Engineering Design
- Web Programming
- Cost Accounting for Engineers
- Mobile and Wireless Technologies
- Metrology with Elements of Physics
- Elements of Electrical Engineering and Electronics
- Computer Systems Architecture

## **Selected specialization courses**

- Web Application Developer

## Foreign language study

### For full-time studies:

- 240 hours of one foreign language (60 hours per semester, from the 2nd to the 5th semester).

### For part-time studies:

- 64 hours of one foreign language in the 2nd and 3rd semesters.

## Study completion requirements

You create a major project that addresses a practical or theoretical problem related to your field of study. By studying literature and conducting your own analyses, you work on an original problem-solving proposal. Everything you learn during your studies enables you to create a professional project based on real data and actions. To earn your bachelor's degree, you must defend this project before a committee. You set the direction of your own project!

## Internships and practical training

Student internships are an important part of the study program. Students of bachelor's and long-cycle master's studies complete 960 hours of internships (24 weeks), gaining professional experience. If you work in a profession related to your field of study, you can have your internship credited based on your employment. During your studies, you also have the opportunity to take a paid internship. Internship programs are designed by cooperating employers, tailoring requirements to specific positions, which helps you take your first professional steps.

### How to become a WSB Merito University student

You can enroll in a **first degree (e.g. Bachelor's or Engineer's) program** if you have successfully completed your secondary education and have a secondary school-leaving certificate.
